Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Ikeya (6439897).

Ikeya (Figures 1-7) shows an insert comprising a supporting portion 13b for supporting an external face of an electronic component 2 wherein the thickness of the portion 13b is less than a distance between a tip or contact portion of the external terminals 2a and a terminal face of the component 2. The supporting portion is configured as a thin plate. A plate member 13 comprising the supporting portion faces the connection terminals 15 of a sheet-shaped socket. The plate member has an opening with a rim for exposing the terminals. The plate member is attached to an insert body 12. The insert can be attached to a tray of testing apparatus. The steps involved in testing a component are inherent.

4. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a certified copy and translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeya (6439897).

Ikeya discloses all the features of this claim as described except the plate member being made of metal. It would have been obvious to one of ordinary skill in the art at the time of the instant invention to make the plate member of metal, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use. In re Leshin, 125 USPQ 416.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Response to Arguments

8. Applicant's arguments filed 4/13/06 have been fully considered but they are not persuasive. Figure 4 clearly shows the thickness of the portion 13b to be less than a distance between a contact portion of the external terminals 2a and a terminal face of the component 2 and even much smaller than a distance between a tip portion of the external terminals 2a and a terminal face of the component 2.
